

How to Prepare Your Keyboard for DR. JECKYL AND MR HIDE

1. Unscrew all screws holding keyboard together.

2. Remove keys except for W, A, S, D, Shift, Space, and the directional keys.

3. Now take the bottom half of the computer and tie it up in a bag.

4. Put the top half of the keyboard back on.

5. Secure the top and bottom halves of keyboard. I use duct tape so I can take it apart for cleaning easily.

6. Now make a peanut butter and jelly sandwich.
